INDUSTRIAL ENGINEERING MANAGER | LEAN MANUFACTURING | PRODUCTIVITY & COST OPTIMIZATION

TIRUPPUR, TAMILNADU, INDIA | 8+ YEARS APPAREL MANUFACTURING | MASTER OF ENGINEERING (LEAN MANUFACTURING)

SUMMARY

Industrial Engineering Manager with 8+ years of experience in apparel manufacturing, specializing in industrial engineering systems, Lean Manufacturing, productivity improvement, cost optimization, capacity planning, SMV/SAM engineering, line balancing and operational excellence. Proven experience improving factory efficiency, reducing manufacturing losses and fabric wastage, optimizing manpower and layouts, monitoring P&L, and leading cross-functional improvement initiatives. Experienced in KPI dashboards, work/time/method studies, skill-matrix analysis, SOPs, production planning support and continuous improvement.

CORE COMPETENCIES

Business Impact

- Improved Average Daily Factory Efficiency from 53% to 68% through industrial engineering and operational improvement initiatives.
- Improved production quantity by 16.71% from June 2026, with continued improvement planning.
- Reduced cutting excess from 5% to 2% through marker-planning optimization, cutting-process controls and continuous improvement.
- Reduced overall factory cost to INR 3.43 through Lean Layout redesign and improved operational flow.

- Reduced production losses by up to 5.99% compared with previous months.
- Developed an internal Helper-to-Tailor skill development pipeline to improve workforce availability, retention and productivity.
- Maintained daily Profit & Loss reports to monitor factory financial performance and operational costs.
- Developed hourly production and efficiency monitoring dashboards for real-time production visibility and loss-time tracking.

Professional Experience

Group IE Manager | SD Garments (Status Knits Group), Tirupur | June 2025 – Till Date

- Lead and manage Industrial Engineering functions across multiple units/factories, ensuring standardization of IE practices.
- Maintained daily Profit & Loss (P&L) reports to monitor factory financial performance and operational costs.
- Improved Average Daily Efficiency from 53% to 68% through line-balancing, manpower and process-improvement initiatives.
- Improved production quantity by 16.71% from June 2026 through productivity-focused IE interventions and production planning.
- Reduced overall factory cost to INR 3.43 by redesigning layouts using Lean Manufacturing principles.
- Reduced manufacturing loss by up to 5.99% compared with previous months through process and operational improvements.
- Developed and implemented a Helper-to-Tailor Skill Development Program to build internal sewing manpower capability.
- Improved workforce availability by implementing attendance-incentive initiatives.
- Standardized operator profiles and machine patterns to support smoother style changeovers and production planning.
- Implemented KPI monitoring and hourly production dashboards covering production, efficiency and loss-time visibility.

IE-In charge | Swift Merchandise, Vijayamangalam | May 2025 – June 2025

- Managed and controlled Industrial Engineering activities for assigned production lines/units.
- Planned and executed line balancing to achieve targeted efficiency and output.
- Improved Average Daily Efficiency from 48% to 50% through IE interventions.

Senior Industrial Engineer | Sakthi Infra Tex Pvt Ltd, Perundurai | Jan 2022 – Apr 2025

- Led work study, time study and method study to establish accurate SAM/SMV and improve productivity.
- Planned, monitored and improved line balancing to achieve production targets with optimized manpower.
- Analysed actual versus planned efficiency, identified performance gaps and drove corrective actions.

- Developed and implemented SOPs for consistent production methods and process control.
- Optimized manpower planning, machine utilization and workflow layouts.
- Drove cost-reduction initiatives through waste elimination and process improvement.
- Monitored capacity planning and supported production planning activities.
- Implemented Lean Manufacturing tools including 5S, Kaizen, VSM and Poka-Yoke.
- Supported new-style/product development through feasibility and process analysis.
- Trained and mentored junior IE staff, supervisors and operators.
- Coordinated with Production, QA, Maintenance and Planning teams for smooth operations.
- Prepared and presented IE reports, dashboards and KPI reviews to management.

Junior Industrial Engineer | Royal Classic Mills (P) Ltd, Tirupur | Aug 2018 – Dec 2021

- Conducted and supported time study, work study and method study for garment manufacturing operations.
- Prepared and updated SAM/SMV for styles and processes.
- Supported line balancing and monitored actual versus planned output and efficiency.
- Collected and analysed production, efficiency and manpower data.
- Supported capacity planning, daily production follow-up, layout improvement and material-flow studies.
- Prepared IE reports, efficiency charts and productivity sheets.
- Identified shop-floor bottlenecks, delays and basic process-improvement opportunities.

Projects Done:

- **Incentive Scheme Plan – Royal Classic Mills (2020):** Developed incentive plans for Girls Bikini and Men's Boxer production lines, including manpower, target and incentive-cost analysis.
- **Profile & Template Development – Sakthi Infra Tex (2023):** Developed a placket-attachment solution for Polo T-Shirts using laser support and templates for quilting styles using PS 800.
- **Cutting Excess Reduction – SD Garments (2025):** Reduced cutting excess from 5% to 2% through marker planning, cutting-process controls and continuous improvement.
- **Attendance Incentive Program – SD Garments:** Designed and implemented an attendance incentive initiative aimed at improving attendance, reducing absenteeism and supporting production efficiency.
- **Helper-to-Tailor Skill Development – SD Garments:** Identified high-potential helpers, provided structured sewing training, monitored skill progression and promoted qualified employees to tailor positions.
- **Hourly Production Monitoring Dashboard – Excel:** Built monitoring for real-time production, efficiency tracking and loss-time analysis using the Man-Machine-Method-Money framework.

TECHNICAL / REPORTING SKILLS

Excel | IE Dashboards | KPI Reporting | Production Monitoring | Efficiency Analysis | P&L Reporting | SMV/SAM Analysis | Capacity & Manpower Planning

BUYERS HANDLED

AUDIT & COMPLINACE EXPERIENCE

Note: Buyer/audit exposure is presented based on the information supplied; specific audit scope, dates and results were not provided in the source resume.

EDUCATION

Master of Engineering | Lean Manufacturing

CAREER TARGET

Target roles: Industrial Engineering Manager | Group IE Manager | Head – Industrial Engineering | Senior IE Manager | Lean Manufacturing / Operational Excellence Manager.
